PHYSERON Is ...

the 100% natural biomass plastic

1. Unlike other biomass plastics, PHYSERON allows 100% recyclability as it is produced purely from plants (ex. bamboo) without petroleum ingredients.

Hence, no hassle of after use, as it can be disposed and burned like other burnable waste without toxic gas emission, and when it is in soil, it collapses and degrades in three to eight months.
**PHYSERON** Is …

**a 100% natural biomass plastics**

2. Like other other biomass plastics, but unlike conventional plastics, PHYSERON has a nice natural touch, color, and a sense of safety, because of it is 100% natural.

3. Like conventional plastics, PHYSERON maintains the same level of productivity, pricing, and hardness as ABS.
